

box

Our mission is to make it incredibly easy for people to work together and connect to the information they need.

# Security: You can't take it with You

Moving to the cloud means leaving legacy  
security models behind

Some mistakes we've made (none)

Not all cloud providers are created equal

# The Tao of Zero

## Zero Trust

- Eliminate implicit trust
- Policy follows Content
- Push controls to Endpoints

## Zero Knowledge

- Customer Data belongs to the customer
- Zero knowledge of information stored in Box
- Push the encryption envelope

## Zero Tolerance

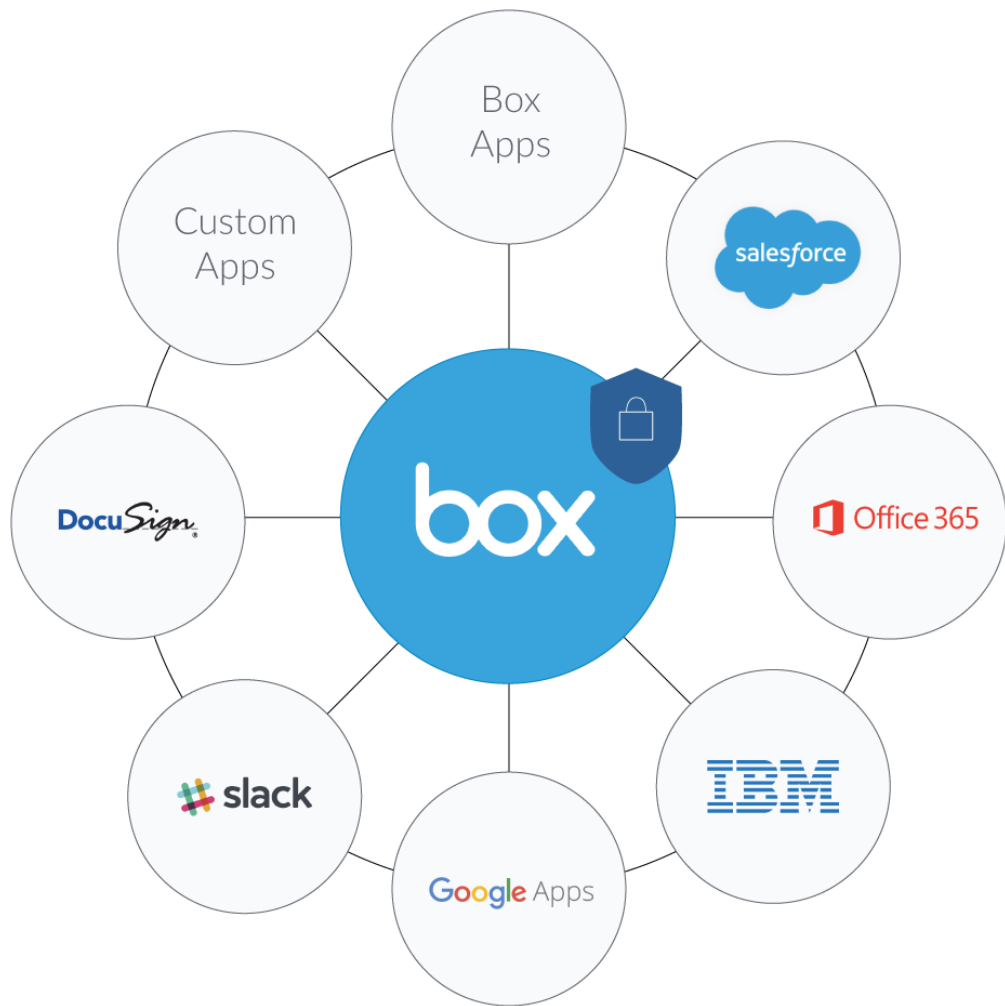

- No tolerance for bad user experience
- Make secure the only way
- Eliminate friction

A photograph of two FBI officers in tactical gear walking on a city street. The officer in the foreground is wearing a black long-sleeved shirt, a tan tactical vest with 'FBI' in yellow, and sunglasses. The officer behind him is wearing a blue short-sleeved shirt, a tan tactical vest with 'JACOBS' and 'FBI' in yellow, and sunglasses. They are both wearing duty belts with holsters. In the background, there are other people in tactical gear, orange traffic cones, and a brick wall.

**The DOJ needed a secure platform to share and  
collaboration with the FBI and US Attorneys**

## Box is different.

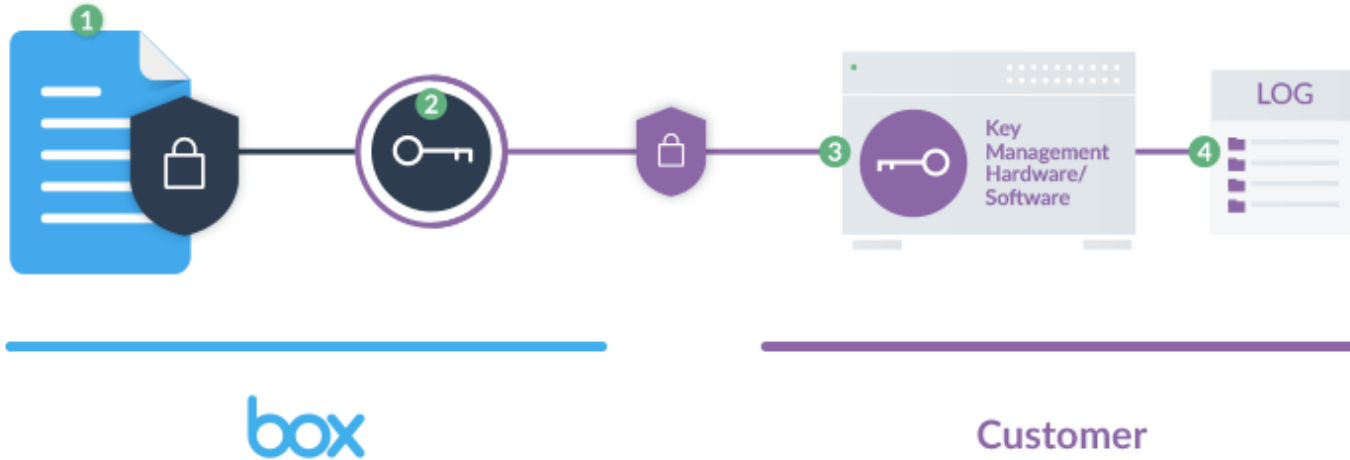

Creates a single source of truth

Connects all of your business apps

Centralizes your security controls

Consolidates FTP servers & file shares

# Bring Your Own Keys

## ENCRYPTION FLOW OVERVIEW

- |                               |   |
|-------------------------------|---|
| 1 File uploaded               | 3 Box Key Encrypted with Customer's Key |
| 2 File encrypted with Box Key | 4 Audit Log Updated                     |
