OOYALA[®] FLEX 

Streamline video production and distribution

Integrate Systems and Processes

Problem

- **Most systems treat metadata as part of the file so if you don't have the file you don't have the metadata**
- **Or the metadata stays in the system and**

Group Asset

Ooyala Flex supports Media Assets, Image Assets, and Text Assets.

Combinations of these can form Group assets.

Metadata

Solution

- **Treat the metadata as a separate layer independent of the source**
 - Assets can be located more rapidly
 - Higher value automated workflows
 - New types of assets can be managed

What next?

- **AI**
 - Extract cognitive information from assets and build richer metadata
- **Thesaurus**
 - Not defined to exact search terms
- **Elastic Search**
 - Easily find anything, anywhere

Thank You
