## EIDR Kicks Off Analytics

A Collaboration of:  
Richard W. Kroon  
Jonathan de Armas  
Jim Whelehan

# The Old World of EIDR Analytics

Richard Kroon  
EIDR Technology Director

# EIDR: What We Have Today

EIDR provides two mirror services (push and pull), but:

- It delivers raw EIDR XML records that can be parsed and stored locally

EIDR provides an XPath-based query service, but:

- XPath (and XML-based query in general) has several limitations
  - You cannot compare things
  - You cannot count things
  - You cannot link field attributes and values
  - You cannot aggregate things
  - You cannot reference the record hierarchy

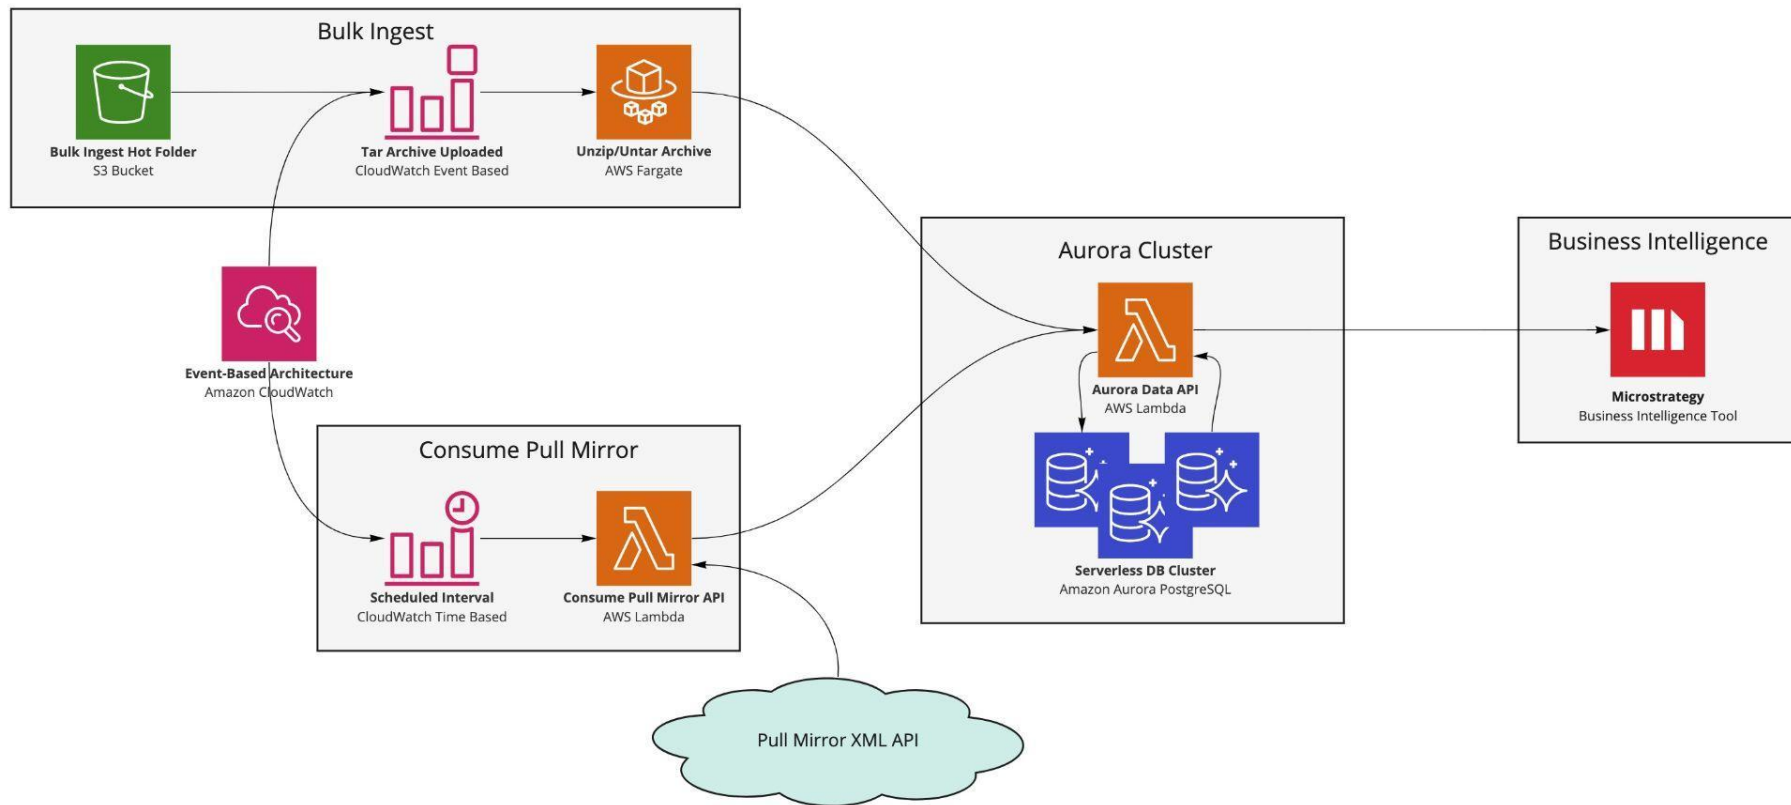

# The New World of EIDR Analytics

Jonathan de Armas  
Owner & Solutions Architect, Island Pitch

The Universal Media Identifier

# EIDR: The New World

## Modern AWS Architecture:

- AWS Relational Database Service (RDS)
  - Aurora PostgreSQL
- AWS Serverless Application Model
  - Cloudformation
  - Lambda
  - Fargate
  - S3
- Automation
  - CloudWatch EventBridge

A Relational Database enables new query types:

- You CAN compare things
- You CAN count things
- You CAN link field attributes and values
- You CAN aggregate things
- You CAN reference the record hierarchy

Microstrategy will be our first integration

# EIDR Viewed through a BI Lens

Jim Whelehan  
Sales Director, M&E, MicroStrategy

+

 **MicroStrategy**<sup>®</sup>

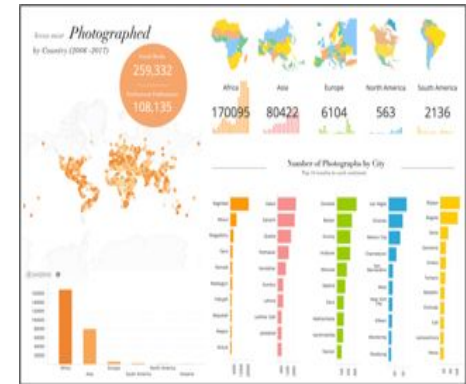

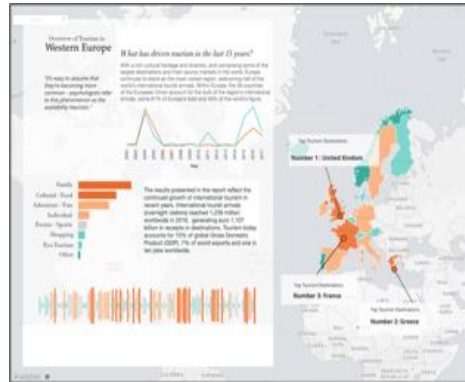

## EASY FOR EVERYONE

**Modern Analytics Experiences Result in Greater Adoption and Increased Impact.**

We put **sophisticated analytics** in the hands of every type of user through a variety of **intuitive interfaces - on Web, Mac, PC, iOS and Android.**

**Analysts** quickly build beautiful visualizations, dashboards, and applications. **Consumers** quickly get answers from elegant interfaces with intuitive analytic controls.
