TITLES RELEASED IN 2021

Why We Built the Whip Media Exchange

The emergence of streaming has vastly complicated content licensing

Today's Challenges

Windows

Exponential increase in types of rights (AVOD / SVOD / TVOD / FAST and oh, yes, LINEAR!)

Platforms

Proliferation of new platforms worldwide

Content

Vastly increased content demand and capacity per platform

Whip Media Exchange

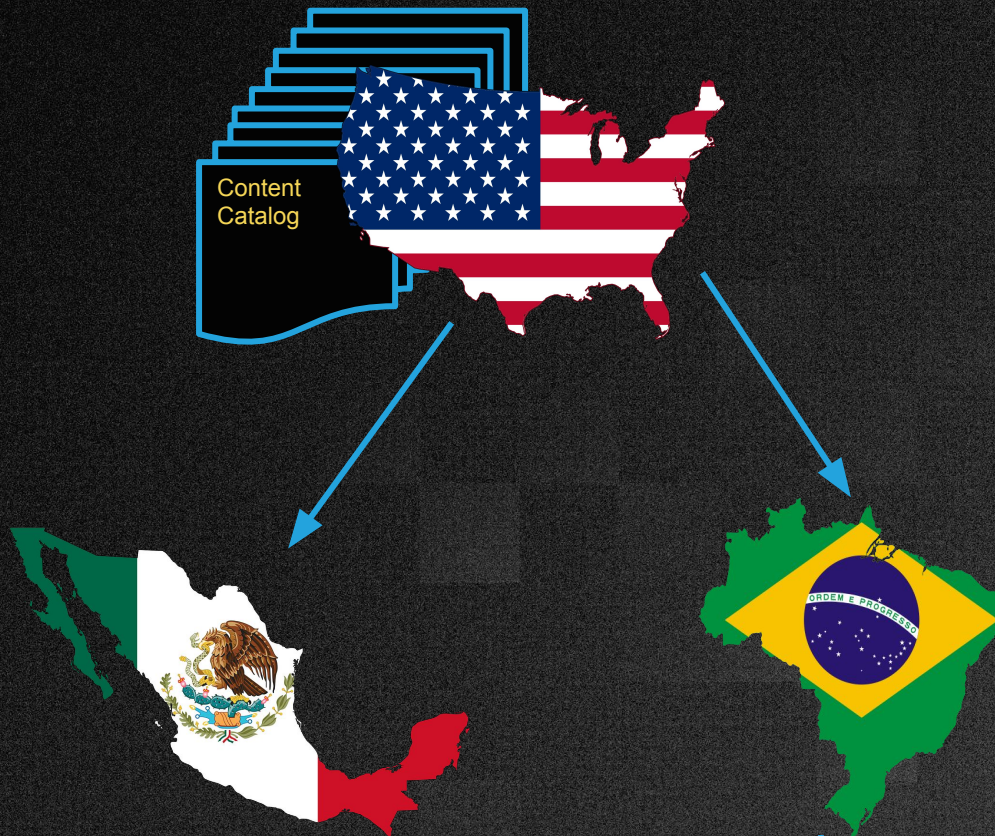

- Learn which content is expected to *perform better*
- *Understand viewer demand* via deep insights into preferences, behavior, engagement and more
- Easily connect with *partners around the world*
- *Adapt rapidly* as the environment and business models change
- *Manage complex workflows*
- *Visibility across hundreds of thousands of titles* and hundreds of platforms globally***

Let's Consider an Example

Will your current catalog work well in a new territory?

Buyers may want to take a previously licensed catalog to new territories

Sellers may want to open new markets for content licensing

Evaluating Content for a New Audience

Predicting performance for a territory where you've never operated before...

... by using the Whip Media Demand Score!

- View Demand Scores for new Territories
- Rank titles by predicted performance
- Select those titles expected to perform at the highest levels
- Identify available content with high Demand Scores which meet other criteria, such as:
 - Age/Gender focus
 - Genre focus
 - Platform or Regional Fit/Appeal

TV Time Brings Understanding to Changing Consumer Behaviors

196

DEMAND SCORE

Predicts title performance at a Platform and Territory level (e.g. for Netflix ES vs Pluto TV ES) as an index

4.5 Million

Film and TV Titles with Demand Scores in dozens of countries across thousands of platforms

Back to Our Example

Consider a set of 10 titles which haven't been offered in Brazil or Mexico before

Demand Scores & Ranks

| | |
|---------|---------|
| Title A | 150 (1) |
| Title B | 125 (2) |
| Title C | 100 (3) |
| Title D | 80 (4) |
| Title E | 50 (5) |

Demand Scores & Ranks

| | |
|----------------|----------------|
| Title A | 60 (3) |
| Title B | 50 (4) |
| Title C | 150 (1) |
| Title D | 40 (5) |
| Title E | 125 (2) |

Demand Scores & Ranks

| | |
|----------------|----------------|
| Title A | 50 (5) |
| Title B | 75 (3) |
| Title C | 100 (2) |
| Title D | 60 (4) |
| Title E | 150 (1) |

While A & B are expected to perform best in the US, we note that C & E should do best in Brazil & Mexico whereas A, B & D are all predicted to be low performers in Brazil & Mexico.

We might then ask, "What should I license instead of A/B/D?"

Evaluating New Content

We can use Demand Scores to select new titles for these markets, as well

Demand Scores & Ranks

| | |
|----------------|----------------|
| Title Q | 160 (1) |
| Title R | 140 (2) |
| Title S | 80 (3) |
| Title T | 60 (4) |
| Title U | 40 (5) |

Demand Scores & Ranks

| | |
|----------------|----------------|
| Title Q | 120 (2) |
| Title R | 125 (1) |
| Title S | 50 (5) |
| Title T | 60 (4) |
| Title U | 70 (3) |

Demand Scores & Ranks

| | |
|----------------|----------------|
| Title Q | 150 (1) |
| Title R | 60 (4) |
| Title S | 100 (3) |
| Title T | 80 (2) |
| Title U | 50 (5) |

We would choose titles Q and R for distribution in Brazil & Mexico - and note that Q would also do well in the US, so if the price is right we'd acquire those rights as well.

Data Driven Licensing

Buyers can dig into each title to see more details, insights and Demand Scores

Content Hub / Yellowstone (2018)

Yellowstone (2018)

2018 | Drama, Western | Ongoing | 3 Seasons

Follow the violent world of the Dutton family, who controls the largest contiguous ranch in the United States. Led by their patriarch John Dutton, the family defends their property against constant attack by land developers, an Indian reservation, and America's first National Park.

Expected Performance For Hulu United States

How does this title perform compared to similar titles?

Understand Gender & Age distribution by Title & Audience

Gender and Age focus helps explain how a Title is expected to perform

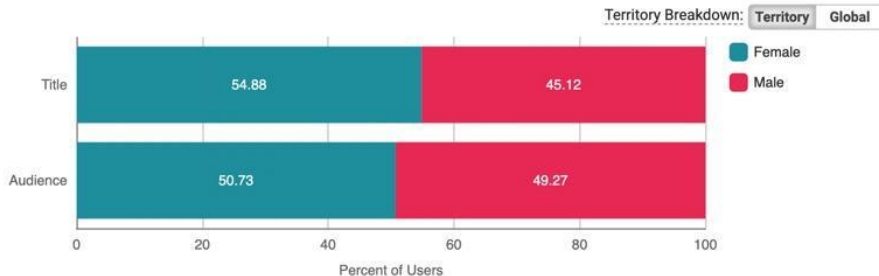

Understand if this Title is the right fit for your target audience for the selected Territory and Platform.

Gender Focus

Balanced

This title has a balanced audience and therefore, does not have a gender skew.

The breakdown for this title is showing actual past performance

Age Focus

35-49

The viewing audience for this Title concentrates in users aged 35-49.

The breakdown for this title is showing actual past performance

Additional “Factors” Provide Greater Context

Demand Score reflects a constellation of viewer behaviors & attributes

| Factors | Impact |
|-------------------------------------|---------|
| Territory Fit | + 14.7 |
| Viewership Affinity | + 14.18 |
| Title's Emotional Profile | + 13.93 |
| Platform Fit | + 9.4 |
| Success of similar content | + 6.8 |
| Success of metadata-similar content | + 2.58 |
| Past Performance | - 4.54 |
| Cultural Compatibility | - 7.39 |
| Genre Popularity | - 10.53 |
| Freshness | - 10.57 |

For exemplary purposes only.

Factors such as Similar Metadata, performance of Similar Titles, Cultural Compatibility and Territorial Fit drive Demand Scores up or down.

Understanding the Demand Score Factors lends context to each title's score.

Whip Media Exchange
