Fully **customizable**, modular suite of services

Data **transparency** – if we get it, you can have it

**Licensing opportunities** to 30+ major TVOD/EST, AVOD & SVOD platforms

Expertise in **marketing**, both on and off-platform

# Case Study - Giant Pictures

## Making avails available

### Solutions:

#### The Whip Media Exchange

*"Whip Media Exchange presents great opportunities to sell content to a variety of domestic and international buyers. Having access to Demand Score is truly a game changer."*

*Emily Hamilton  
Distribution & Sales Manager*

### The Challenge/Goal:

Giant wanted a solution that properly read territory and streaming rights to ensure that avails presented to each buyer were in fact available for licensing; which would then trigger avails creation and title preparation. Expansion also meant reaching more countries and platforms, and increasing the number of titles on Giant's slate each month. They needed detailed information on title performance and market demand – essential to both evaluate potential interest from streaming platforms and/or create compelling programming strategies that presented a strong, curated package of films for buyers.

### ROI/Value Achieved:

Leverage Demand Score insights to predict title performance based on key demographics, content attributes, audience engagement and real-world viewing behavior.

Surface new opportunities and improve ROI with smarter deals that showcase, curated relevant packages tailored to each buyer on a global scale.

Orchestrate rights management by knowing that each buyer is reviewing films that are available for licensing by region, platform and window.

Improve avails management with the auto-avail feature to automate avails creation and quickly prepare titles for multiple buyers.
