

Working Groups

Current 2022 & Expansion in 2023

CDSA operates according to 5 Principles:

Community, Community, Community.

Address Gaps.

Provide Leadership.

Be the Glue.

Serious but Fun.

CDSA Delivers Value through 4 key areas:

Community

We have a broad range of leaders and companies from across M&E sectors, value diversity and inclusion, and tend to become more friends than colleagues.

Working Groups

Our various member-defined and led working groups drive Best Practices for many of the common current and emerging industry challenges.

Events

Reinforce our Community through networking, leadership and insights, personal and professional development, and having a bit of fun...and virtually too.

Vision

We recognize the need to occasionally define a clear vision or guide in an area that the industry can then rally around.

Focus Area: Working Groups spanning the M&E Lifecycle

Planning (Decisions)	Production	Distribution	Consumption (Revenue/\$)
	Production Security Working Group	Acct Mgmt / Enforcement Working Group	Customer Conversion Working Group
		Security of Streaming Devices Working Groups	
		Anomalous Devices Working Group	
		Renewal & Provisioning Working Group	
	Copyright & Licensing Working Group
